### PROFILE

I am a third-year Software Engineering student with 2 years of experience in coding and developing projects in front-end development. As a diligent and dedicated worker, I am seeking an internship position where I can further develop my skills.

### PROJECTS EXPERIENCE

#### Online Game Store

2024

- As passionate Java developers, my two teammates and I are working on an online game store application that utilizes linked lists and trees for efficient data management. We aim to enable users to find products according to their preferences and tastes. We completed this project in June. To get more details about this project you can visit my GitHub page through the link in the contact section above.

#### My Personel Website

2024

- You can reach my personal website through the link in the contact section above.

#### Website construction for IconHalı

2024-Ongoing

- I am going to construct a responsive website for company named IconHalı. I am going to share details on my GitHub page.
